MOUNTAIN

2012 | 2013 MOUNTAIN

Our passion and enthusiasm for the mountains at SCOTT is year round, whether on a mountain bike, hiking a trail or flying through waist deep powder. This passion is what brought Ed Scott to develop his revolutionary aluminum ski poles in 1958 laying the foundation for SCOTT sports. The same motivation drives us to make history again and again, to test the limits of what is possible and constantly develop new products.

INNOVATION - TECHNOLOGY - DESIGN

describes what you can expect from SCOTT products. We are proud to present a Mountain collection filled with innovations. Find out for yourself!

FREESKI

For years SCOTT has been at the vanguard of the free ski movement and has been advancing the sport with constant new developments in equipment. The new PURE ski was developed in close cooperation with our team riders and has all the latest ski technology and innovation available from SCOTT.

SCOTT PURE

Working off its successful predecessor, the updated Pure delivers effortless performance and stability. Pro-Tip Rocker geometry, combined with the Venturi Tail, offer exceptional control and float in deep snow conditions.

PRO-TIP ROCKER

SCOTT's Pro-Tip produces a more consistent ski flex and predictable turns by using a progressive tip height radius.

DUAL RADIUS

SCOTT skis combine two radii (dual radius) to create the sidecut or "shape" of the ski. This Dual Radius creates a more versatile ski, which is not confined to one type of skiing or terrain. The bigger front radius provides great stability and forgiveness in all types of snow conditions.

VENTURI TAIL

Venturi geometry decreases the running surface pressure, allowing the ski to track better with less effort. The result is a ski that will be more forgiving without sacrificing performance.

BINDING

The SCOTT GUARDIAN BC 16 pairs the performance features of an alpine binding with lightweight materials and improved design resulting in the most reliable touring binding on the market. An improved walking mechanism, lower ski boot positioning, and reliable release make the SCOTT GUARDIAN BC 16 one of the most advanced bindings on the market.

SCOTT GUARDIAN BC 16

- ❶ DIN 7-16
- ❷ Ski pole can be used to easily switch between hike & ride
- ❸ Increased skiing performance achieved by using double freeflex construction
- ❹ 90° pivot and flat nose design for optimal climbing capacity
- ❺ Adjustable toe height

FREERIDE MOUNTAINEERING

We don't make compromises when it comes to skiing. Fast slopes and steep couloirs require stable and reliable skis. Innovative design and materials make SCOTT Mountain skis so light that even the climb is enjoyable.

SCOTT X PLOR 2-PART 16

For Freeride Mountaineers, this stiff and durable pole features a 3M Gripping Zone for comfort and performance while ascending.

SCOTT POWD' AIR

The Powd'Air ski uses the same construction as its little brothers the Xplor'Air and the Crus'Air. The specially designed carbon frame offers the performance of a 100mm without the excess weight, making the climb a little easier and allowing you to save your energy for the fun part: going down!

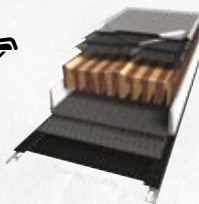

LENGTH	TIP	WIDTH	TAIL	RADIUS	G/PAIR
163	123	96	117	17.5	3140
173	129	98	120	18.5	3480
183	134	100	123	19.5	3840

SCOTT CRUS' AIR

The Crus' Air is for those looking to avoid the crowds. With 90-92mm under the binding and rocker tip, it can handle most snow conditions and terrain.

LENGTH	TIP	WIDTH	TAIL	RADIUS	G/PAIR
169	128	90	115	15	3120
179	129	92	116	16	3460

SCOTT XPLO'R' AIR

The Xplor'Air combines a wood core with air-channel construction to minimize weight and improve performance without compromising quality. A carbon fibre top sheet reduces overall weight and offers performance and control when descending.

LENGTH	TIP	WIDTH	TAIL	RADIUS	G/PAIR
165	116	78	106	14	2380
175	118	80	108	15.5	2580

SCOTT FLY' AIR

The Fly'Air is the first ski to be part of SCOTT's lightweight freeride mountaineering ski range. Its superlight Paulownia wood core guarantees it to be light, easy to turn and responsive.

LENGTH	TIP	WIDTH	TAIL	RADIUS	G/PAIR
165	116	78	106	13	2180
175	118	80	108	14	2380

3D CARBON FRAME

Using a 3D frame, the innovative carbon laminate ski construction found in our Mountain ski line creates an exceptionally lightweight freeride mountaineering ski, while dramatically increasing torsion rigidity on steep terrain.

SCOTT SKINS

A mohair skin especially designed for our skis offers specific premium solutions for simple and uncomplicated use.

FREERIDE MOUNTAINEERING PACK

The fascinating landscapes hide their own unique risks. Avalanches are a constant threat, so we have expanded our Air mountain backpack range with the Air 30 RAS. This technical back pack is compatible with the RAS avalanche balloon system from Snowpulse and can significantly reduce the risk of injury or death while skiing in the backcountry.

SCOTT AIR 30 RAS

Fully equipped with a ski-carrying system, an ice axe attachment, and a separate compartment for avalanche equipment and tough aluminum clips, this backpack is an outdoorsman's best companion. Compatible with the RAS avalanche balloon system from Snowpulse, the easy installation and removal allows this pack to be truly functional from winter to summer.

*30l Volume, 1200 g
RAS Ready*

R.A.S. - REMOVABLE AIRBAG SYSTEM

The airbag concept is based on the physical principle of inverse segregation. A phenomenon whereby, given a uniformly moving mass of particles, the smaller particles sink downwards and the larger ones float to the surface. The inflated airbag increases the victim's volume and greatly amplifies this inverse segregation effect. In the event of an avalanche, the user must tug on the handle to trigger the release of gas from the high-pressure cartridge: this inflates the 150-litre avalanche airbag within 3 seconds. The avalanche backpack helps prevent total burial in the snow. And its bright colour aids rapid localisation.

R.A.S.

REMOVABLE AIRBAG SYSTEM

SCOTT RESCUE PACK

The ideal pack for backcountry adventures

Shovel: 620 g

Probe: 240cm, 200g

FREERIDE MOUNTAINEERING HELMET

SCOTT is proud to introduce a new generation of helmets specifically designed for those who want to explore the final frontier and who need the best protection in both worlds of freeride mountaineering; climbing and skiing.

White/Blue Matte

SCOTT COULOIR

The Couloir is the ultimate helmet for those seeking protection when climbing and skiing.

The Couloir can be converted from a ski helmet to a rock-climbing helmet by removing the ear padding and inner lining. The small permanent pads provide ventilation and comfort, side attachments hold a headlamp for night conditions, and a small brim around the helmet to keeps moisture off your face.

The SCOTT Couloir provides optimum safety by following both mountaineering standard CE EN 12492 and ski helmet standard CE EN 1077.

Black Matte

SCOTT M-R.A.S FIT SYSTEM

The SCOTT Couloir features the newest and lightest SCOTT M-R.A.S. SYSTEM. It provides a comfortable fit to the skier's head.

SCOTT L.P.D (Low Profile Damping) Construction

Located on the crown of the helmet, the SCOTT Low Profile Damping (L.P.D) design provides the maximum level of protection by maintaining just the right amount of damping material. L.P.D is a low profile construction resulting in one of the thinnest mountaineering helmets on the market.

EYEWEAR

SP SCOTT
PRECISION OPTICS

SCOTT Precision Optics is a quality label that stands for premium materials and technological expertise. This unique combination enables us to offer distortion free and UV protected, high performance lenses of the best quality.

SCOTT APPROACH

SCOTT Approach takes mountaineering to a whole new level. All of our finest materials and technologies come together in these masterful sunglasses, delivering nothing but protection, performance and comfort for your high mountain expeditions.

White
Solar 4 lens
Light transmission: 5%
Cat. 4

SCOTT FIX

White
Light Sensitive Bronze Chrome
Light transmission: 45%-15%
Cat. 1-3

Our iconic and most popular ski goggle just keeps getting better. With an exceptional field of vision, bold patterns and colourful frames, the Fix is unmatched in performance and style.

light sensitive

SCOTT Light Sensitive lenses use photochromic technology and adapt automatically to sunlight intensity. Light Sensitive lenses react to light changes; within seconds the lens will darken if the sunlight gets stronger or lighten if the sunlight gets weaker.

SCOTT REPLY

White
Solar 3 lens
Light transmission: 12%
Cat. 3

Specifically designed for smaller faces, the Reply is an all mountain goggle equipped to handle the boundless outdoors. Blending together some of our best features, the Reply delivers superior quality in a smaller package

solar blocker

SCOTT Solar Blocker lenses are designed specifically to block high-energy visible light and are for use on the brightest of days.

MOUNTAIN
APPAREL

MOUNTAIN APPAREL

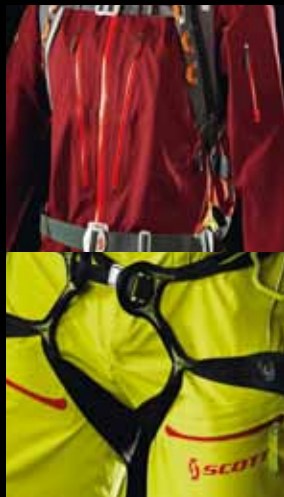

Protecting you from Mother Nature's worst - wind, rain, driving snow - and allowing unrestricted movement and breathability, our diverse line offers you the right gear for your needs. We push the limits of innovation so that you can push your limits and reach new goals. SCOTT Mountain apparel takes you there and keeps you going.

TECHNICAL FEATURES

HELMET COMPATIBLE HOOD

Maximum viewing field. One hand draw-cord, double regulating with laminated shield.

TECH POCKET SYSTEM

Harness and backpack compatible pocket placement.

VENTILATION SYSTEM

Zippers for individual climate control.

ABRASION RESISTANT CUFF AND CUFF ADJUSTMENT SYSTEM

SCOTT EXPLOR- AIR JACKET

A reliable companion in extreme conditions. Our 3-layer Pro Shell Gore-Tex®, known for its extreme durability and breathability can easily stand up to any mountain challenge from ski mountaineering to ice climbing.

SCOTT EXPLORAIR TECH PANTS

The perfect accompaniment to our Explorair Jacket, our new Gore-Tex® Pro Shell pants are specially designed with the most demanding skiers and extreme conditions in mind. They are strong, durable, but still light, and will help you get to the top or bottom of any mountain.

SCOTT JOVE PANTS

Our Duraclimb soft shell pants are water and wind resistant and comfortable to wear. They have everything you need from a functional pair of pants for a day on the mountain.

SCOTT VIRETTA JACKET

Our newest year-round shell keeps you fully protected from the elements while giving you an enhanced range of motion with new 4 way stretch. Soft to the touch and light as a feather, the Viretta is sure to be your next favorite shell. A comfortable and quality basic great for a day skiing, hiking or climbing.

SCOTT DECODER JACKET

Good for you and good for the Earth, this Primaloft® insulator is not only warm, but light, packable and made from 70% recyclable materials. Even on the wet days this is the one insulator you want to have thanks to its Primaloft® insulation and DWR coating.

SCOTT AZTEC JACKET

The perfect year-round companion! Layer it up in the dead of winter or wear it alone in the spring, it is a must for any outdoorsman.

SCOTT EXPLOIT JACKET

A hardcore shell with a softer, fashionable side. The Exploit protects you from wind and water while being highly breathable and giving your look a little edge. A stylish jacket, the Exploit can protect you on a rainy summer hike or day on the slopes.

SCOTT AZTEC PANTS

Our new Gore-Tex® with Paclite technology pant provides versatility and great ease of use. As easy to wear in the dead of winter as on a beautiful spring day, our new 2-way side zips also makes them easy to wear for both skinning up and flying down the hill.

SCOTT KICKSTART JACKET

Whether you are climbing to the top of a mountain, or going out for the night, our newest, extremely light down insulator will add the needed warmth underneath a triple layer jacket and keep you "in style" when you are out on the town.

SCOTT FZ CARDIGAN JACKET

Our favorite new layering piece, this attractive natural merino midlayer keeps you warm, while controlling odors and wicking away moisture, ideal for any high endurance activity, including hiking, climbing or back-country skiing.

SCOTT W'S CRUSAIR ANORAK

The stylish and minimalist Anorak utilizes the light and breathable Gore-Tex® Active Shell, making it perfect for ascents on stormy days. With bold colors the Anorak allows you to show off your inner fashionista.

SCOTT W'S EXPLORAIR TECH PANTS

Designed for the true alpinist, our new Gore-Tex® Pro Shell pants are tough, durable, light, and even stylish. Event the most technical ascent, rock climb, or the hardest descent, is not a problem with these pants.

SCOTT W'S AZTEC PANTS

To have everything covered from head to toe, grab our new Gore-Tex® Pac Lite pants for outdoor activities any time of the year. Our new 2-way side zips also makes them easy to wear both on the strenuous climb to the summit and the pleasant descent.

SCOTT W'S KICKSTART JACKET

Whether you are climbing to the top of a mountain, or out on the town, our newest, extremely light down insulator will add the needed warmth underneath a 3layer jacket and keep you "in style" when you are out on the town.

SCOTT W'S EXPLORAIR JACKET

Our toughest jacket for the hardest conditions still manages to keep a feminine touch, our 3-layer Gore-Tex® Pro shell will protect you from the elements * while still letting you look good, from mountaineering to ice climbing.

SCOTT W'S EXPLOIT JACKET

A functional yet fashionable hard shell, the Exploit protects you from wind and water while remaining highly breathable. Great year-round, you will love wearing it on a rainy summer hike or a wintry ski day.

SCOTT W'S DECODER JACKET

Good for you and the Earth, Primaloft® insulator is not only warm, but also light, easy to pack into tight spaces and made from 70% recyclable materials. With its synthetic Primaloft® insulation and DWR finish, this jacket is ideal even on damp days.

SCOTT W'S AZTEC PANTS

To get you outfitted top to bottom, grab our new Gore-Tex® Pac Lite pant any time of the year. Our new 2-way side zips also makes them easy to wear both on the strenuous climb to the summit and the pleasant descent.

SCOTT W'S AZTEC JACKET

Perfect for your next hike or powder day, this Gore-Tex® shell is simple and stylish and can be combined with additional layers for low winter temperatures or worn alone in spring.

SCOTT LS HOODY

A lighter-weight merino weave, this long-sleeve pull-over is perfect for layering or for activities in cold weather. With an attached hood, thumb-holes, and asymmetric neck zip, this mid-layer shirt provides a little extra fashion flare ideal for any sweat-inducing endurance sports including hiking, climbing or back-country skiing.

MOUNTAIN GLOVES

Durability, dexterity and warmth are the hallmarks of SCOTT Mountain Gloves. Made to withstand the elements while providing a superior grip. SCOTT gloves are the key to your wild mountain adventures.

SCOTT DAWSON

The right choice for any Alpine adventure, our new Gore-Tex® gloves with removable liner and reinforced palm. The ergonomic form provides optimal manual dexterity whether for ice tools or ski poles. The long cuffs provide maximum protection.

Pittards

SCOTT TETON

Perfect for big mountain skiers ready to get down to business. Extremely warm and durable, the Gore-Tex® insert makes these the ideal glove for wet and cold conditions, while the leather and softshell outer fabric give you great warmth and dexterity.

Pittards

SCOTT BELMONT

A versatile glove that delivers warmth, comfort, and durability. With a Hypora® waterproof and breathable insert, Atomic Pittards™ leather patches for great grip-ability, and a soft leather palm, you can wear this glove on your ascent, descent, and anywhere in-between.

HYPORA
